

DOCKET NO. US000036 (PHIL06-00069)
U.S. SERIAL NO. 09/498,261
PATENT

IN THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) A receiving system comprising:
a content access device that is configured to receive content material simultaneously with an item identifier associated with the content material from a provider, and
a purchase request processor, operably coupled to the content access device and an input device, that is configured to receive a purchase request from the input device and the item identifier directly from the content access device ~~[[,]]~~ and to produce ~~[[s]]~~ therefrom a processed purchase request,
a rendering device, operably coupled to the content access device, that is configured to render the content material; and
~~the input device including m, and~~
a purchase request buffer for storing at least one purchase request from the input device and the item identifier to facilitate a purchase of an item corresponding to the item identifier subsequent to the rendering device rendering the content material, and
wherein the content access device is further configured to communicate the processed purchase request to the provider.

U.S. SERIAL NO. 09/498,261
PATENT

2. (Previously Presented) The receiving system of claim 1, wherein the content access device is further configured to associate the purchase request and the item identifier based on a coincidence of a time of receipt of the purchase request and a time interval associated with the rendering of the content material.

3. (Currently Amended) The receiving system of claim 1, further comprising
[[.]] a memory, operably coupled to the content access device, that is configured to store the content material, and

wherein the content access device is further configured to control access to the content material in the memory, the ~~control~~ access being dependent upon a receipt of an authorization from the provider in response to the processed purchase request.

4. (Currently Amended) The receiving system of claim 1, wherein the purchase request processor is further configured to receive a transferred purchase request and a transferred item identifier [[.]] and to produce therefrom the processed purchase request.

5. (Currently Amended) The receiving system of claim 1, wherein the purchase request processor is further configured to receive certification information associated with the purchase request, and

wherein the processed purchase request ~~includes~~ comprises the certification information.

PATENT

6. (Cancelled).

7. (Currently Amended) A portable device comprising:
a broadcast receiver that is configured to receive audio and visual content material simultaneously with an item identifier associated with the content material from a broadcast source,
a rendering device that is configured to render the content material,
a purchase request buffer that is configured to store at least one purchase request and the item identifier to facilitate a purchase of an item corresponding to the item identifier subsequent to the rendering device rendering the content material, and
a [" "] buy [" "] switch that is pre-programmed with a user's predetermined purchasing information, and wherein the purchase request is sent to the purchase request buffer in response to a single activation of the buy switch without the user being required to enter any additional data.

8. (Currently Amended) The portable device of claim 7, further ~~including~~ comprising a controller that is configured to associate [[s]] the purchase request and the item identifier based on a coincidence of a time of receipt of the purchase request and a time interval associated with the rendering of the content material.

9. (Currently Amended) The portable device of claim 8, wherein the controller is further configured to receive information associated with the purchase request, and
wherein the purchase request buffer further ~~includes~~ comprises the certification information.

U.S. SERIAL NO. 09/498,261
PATENT

10. (Currently Amended) The portable device of claim 8, further comprising [[:]]
a memory, operably coupled to the broadcast receiver, that is configured to store the content material,
and

wherein the controller is further configured to control access to the content material in the
memory, the ~~control~~ access being dependent upon a receipt of an authorization in response to a
communication of the purchase request to a provider.

Claims 11-14 (Cancelled).

U.S. SERIAL NO. 09/498,261
PATENT

15. (Currently Amended) A method for facilitating a purchase of an item ~~[[ma]]~~,
the ~~process~~ method comprising:
receiving the content material simultaneously with an identifier of the item,
rendering the content material,
~~allowing an impulse purchase to be made by~~ receiving a buy command at a time that is
coincident with a time interval associated with the rendering of the content material ~~so that a~~
~~purchase can be made during review of the content material,~~
creating at least one purchase request that ~~includes~~ comprising the identifier of the item in
response to the buy command,
storing the at least one purchase request for subsequent purchase of the item, and
communicating the purchase request to a provider of the item,
wherein receiving the buy command ~~includes~~ comprises receiving an activation signal
associated with an activation of a ~~[[]]~~ buy ~~[[]]~~ switch that is pre-programmed with a user's
predetermined purchasing information, and wherein ~~an impulse~~ a purchase request is sent to the
purchase request buffer in response to a single activation of the buy switch without the user being
required to enter any additional data.

16. (Cancelled).

PATENT

17. (Currently Amended) The method of claim 15, further ~~including~~ comprising:
storing the content material, and
controlling access to the content material based on receiving the buy command.
18. (Original) The method of claim 17, wherein controlling access is further
dependent upon receiving an authorization from the provider in response to the purchase request.
19. (Currently Amended) The method of claim 15, further ~~including~~ comprising
transferring the purchase request to one or more intermediary devices, and
wherein communicating the purchase request to the provider is via the one or more
intermediary devices.
20. (Currently Amended) The method of claim 15, further ~~including~~ comprising
attaching certification information to the purchase request that is communicated to the provider.
